Re- Road Access

In regard to access from Richmond St into our property, we are enquiring if there has been any update available.

Can this also be taken to the next Shire meeting please to be discussed as we would like this to be resolved as soon as possible. We have had no further correspondence from the PTA also. Can we be notified with any more information about this please.

To Councillors of Williams

Re-Channon St Williams

As you are aware of this ongoing matter regarding the closure of Channon St, we would appreciate it being closed permanently . This street has never been constructed and probably never will. There is no Channon St signage or roadway so its classed as a ghost street. With us having different address to the street we are actually living on, Richmond St, this adds even more confusion when Emergency services try to find us or people that we have to explain to how to get here because they try and google our number and Richmond St and it takes you over the other section of Richmond St.

As we are in the stages with the Public Transport Authority to gain access across there part of land (our driveway over railway line) we have to wait for there outcome and permission, and we have no idea how long this will take.

Why was there such bad management to allow properties to be built in this town, when we find out all these years later we don't have the right for access onto our own property.?

Peter Logie is also having the same issues as us, and he would also like this resolved, because of the confusion of street names and addresses.

Regarding the closure of Channon St Williams 6391.

Dear Peter,

**We would like permission for the name and road closure of Channon St Williams.
This road is below Michael Italiano & Peter Logies property and above Richmond St, as you may be aware there is no useable road there at all...**

This has caused numerous problems when people try to find us on Richmond St and nothing comes up in our names because its under Channon St and there is no road or signage to Channon St, when we have to use that address. This is so common why people and the Water Authority, Telstra, or Synergy even question us about it.

This just causes utter confusion to so many people. Myself and Peter Logie have been using Richmond St as our address so its easier for people to know where we are for quite a while now.

**Could this be taken to the Council Meeting please.
If any more information is required please contact me.**
